

Customer Journey Map

HDI Prediction System | Team Lead: Farzana | Contributors: Chinthoti Raghavendra, Ahmad Kabir Shaik, Naga Sireesha Naralasetty, Sitha Ramaraju Velisala

Awareness

- **Does:** Hears about the HDI Prediction System through college project demos, GitHub, or the SmartBridge showcase.
- **Thinks/Feels:** Curious if the tool saves time over manual HDI calculation.
- **Pain point:** No easy way to try it without visiting the link.

Discovery

- **Does:** Opens the deployed Flask web app and explores the homepage and input form.
- **Thinks/Feels:** Wonders how accurate the prediction will be and what indicators are needed.
- **Pain point:** Unfamiliar with which indicator values to enter.

Interaction

- **Does:** Enters indicator values (life expectancy, income, education) and submits the form.
- **Thinks/Feels:** Hopeful the model gives a fast, reliable result.
- **Pain point:** Unsure if entered values are in the correct format or range.

Result

- **Does:** Instantly receives the predicted HDI score on the results page.
- **Thinks/Feels:** Satisfied with the speed; curious how it compares to official rankings.
- **Pain point:** Wants more context on what the score means.

Retention

- **Does:** Returns to test different indicator combinations or shares the tool with peers.
- **Thinks/Feels:** Confident using the tool for quick estimates and coursework.
- **Pain point:** None significant — tool meets the core need.
